FOREWORD

1. Regulation 21 of the National Health Service (Hospital Accounts and Financial Provisions) Regulations, 1948, (Statutory Instrument, 1948, No. 1414), made under the provisions of Section 55 of the National Health Service Act, 1946, provides that each Board of Governors and Hospital Management Committee shall prepare annual cost accounts in such form as the Minister may require in respect of each hospital under its control.

POSITION PRIOR TO 1st APRIL, 1957:

2. From the year ended 31st March, 1951, until the year ended 31st March, 1957, a simple system of cost analysis based on the headings of the financial accounts was in operation, as an interim measure, throughout the hospital service in England and Wales. The form of cost statement used provided for the charging of all expenditure, apart from that relating to a few quasi-trading services, on a subjective basis, e.g. under such general headings as salaries and wages, provisions, fuel, etc., and did not, of itself, provide information as to the costs of particular departments and services of a hospital.

3. The system aimed at providing, for each of the headings of expenditure and in total, the "Average Cost Per Week of Maintaining a Patient", a notional adjustment being made to the total cost, but not to the cost of individual items, for expenditure relating to out-patients, in order to produce an average "In-patient Cost Per Week". True out-patient costs can be ascertained only by detailed departmental costing but in the absence of arrangements for such costing the elimination of out-patient costs was achieved by apportioning the total expenditure between in-patients and out-patients on the basis adopted for the Emergency Hospital Scheme during the late war that five out-patient attendances represented the costing equivalent of one in-patient day, though it was recognised that this assumption was questionable. For the years 1955-56 and 1956-57, an "In-Patient Cost Per Case" was also produced for hospitals other than those which had a preponderance of long-stay patients, calculated by dividing the total expenditure relating to in-patients (after adjustment for notional out-patient expenditure) by the total number of discharges and deaths.

No account was taken of the administrative expenses on central offices maintained by hospital authorities, except where these expenses were interlocked with the administrative expenses of the hospital itself and could not be segregated.

4. Late in 1953, the Minister set up a Working Party to devise a system of costing the departments and services of a hospital within the framework of a subjective accounting system. The Working Party's Report * was published in July,,1955, and, after consultation with hospital bodies and organisations, the Minister decided to accept the main recommendations of the report, and to introduce these with effect from 1st April, 1957.

POSITION SINCE 1st APRIL, 1957:

5. The new costing arrangements provide for the introduction, by stages of a full departmental costing system (the "Main Scheme") which shows not only on what items but also in which of the main departments of the hospital expenditure is being incurred. For the year ended 31st March, 1958, the Main Scheme was operated in some 200 hospitals – principally Acute and Mainly Acute – each with an annual expenditure of £150,000 or more. The costs of those hospitals were published on 29th October, 1958. ⁄

6. All other hospitals operated in 1957-58 the "Alternative Scheme" – an improved version of the costing arrangements which were in force to 31st March, 1957, and have produced unit costs for certain departments based on the principal direct expenses (e.g. salaries and wages and materials) of those departments. The costs for these hospitals are contained in this publication "Hospital Costing Returns, Year Ended 31st March, 1958 – Volume II".

7. The cost statements of hospitals which operated the Alternative Scheme in 1957-58 are arranged in this publication as follows:–

Part I – Hospitals administered by Regional Hospital Boards and Hospital Management Committees.

Part II – Hospitals administered by Boards of Governors of Teaching Hospitals.

---

* Report of the Working Party on Hospital Costing – H.M.S.O., Price 2/- net.

⁄ National Health Service Hospital Costing Returns, Year ended 31st March, 1958. Volume I. H.M.S.O., Price £1. 12s. 6d. net.

8. The hospitals are listed by types (see note 1 of the Explanatory Notes which follow) for each Regional Hospital Board (Part I) and Board of Governors (Part II) and are shown in descending order of number of occupied beds.

Included in Part I are certain institutions (to which reference is made in paragraph 11 below) in which accommodation is used jointly by the hospital authority and the local authority.

9. For each hospital, the total net in-patient cost per week is shown in column 25 and, in most cases, an analysis of this figure under various subjective headings appears in columns 7–24. Because of difficulties in the elimination of out-patient expenditure, it has not been possible this year for every hospital with a significant number of out-patient attendances to furnish this analysis. Hospital authorities have been informed, however, that when cost statements for 1958-59 come to be completed, the Minister trusts that arrangements will have been made for figures to be supplied under all headings.

Except for hospitals with a preponderance of long-stay patients, the total net in-patient cost per case (calculated by dividing in-patient expenditure by the total number of discharges and deaths) appears in column 26.

10. Unit costs for certain departments, based on the principal direct expenses of those departments, together with the numbers of units are shown in columns 27–48. The cost unit is determined by the nature of the department. In the case of catering, for instance, it is "per person fed per week" (i.e. both patients and staff) and in the case of laundry it is "per 100 articles laundered".

Medical Service Departments (Radiotherapy, Diagnostic X-ray, Pathological Laboratories, and Physiotherapy) are not costed separately in some hospitals with an annual expenditure of less than £50,000. In certain other cases departmental costs have not been included in the summary because the hospital has not been able, in the first year of the new costing arrangements, to produce the required information (e.g. assessments of the cubic capacity of hospital buildings have not always been available.)

11. The statements of costs included in Part I of this publication in respect of (1) certain former local authority institutions in which accommodation is reserved to the local authority for the purpose of Part III of the National Assistance Act, 1948 and (2) certain local authority owned institutions in which accommodation is reserved to the hospital authority, exclude the costs of the local authority accommodation. The extent to which the costs are analysed in these cases has necessarily been determined by the varying terms of the individual agreements with the local authorities.

12. The summaries in Part III of this publication show certain national average costs for the years 1955-56 to 1957-58 inclusive, the figures for 1957-58 covering not only the hospitals included in this publication but also those included in Vol. I and which operated the Main Scheme. Comparison of in-patient costs for 1957-58 with those for earlier years must, however, be made with caution. The arrangements operative from 1st April, 1957, provide for a separation of in-patient and out-patient expenditure which is more accurate than hitherto (and has generally resulted in an increased assessment of in-patient costs) and, for the first time, for the consistent inclusion in costs of expenditure on administrative services provided centrally by group offices. Provision has also been made in the Main Scheme for the inclusion of depreciation charges on a limited scale, i.e. in respect of certain equipment used in laundries and diagnostic X-ray departments.

13. The explanatory notes appended contain (1) definitions of the classification of hospitals which has been adopted for the purpose of uniformity in preparing the statements of cost; (2) an amplification of certain headings of the summary; (3) details of the principal direct expenses on which unit costs have been based; and (4) an explanation of certain symbols and and abbreviations.

14. Notwithstanding the limitations of the costing system in force to 31st March, 1957, the making of comparisons between the costs of broadly comparable hospitals and investigations into the reasons for differences has undoubtedly helped to promote economy, improved efficiency and improvements in methods of administration. With the advent of the more comprehensive systems now in force, hospital authorities should be able not only to continue but also to extend their investigations, thereby achieving further economies of management and greater efficiency in the use of the funds available to the hospital service. It is largely with this object in view that the costing returns are published.

Ministry of Health,
January, 1959.

EXPLANATORY NOTES

1. The definitions which have been adopted for the classification of hospitals for costing purposes for the year 1957–58 are as follows. "Excluded departments" are those for mental illness, mental deficiency, diseases of the chest, chronic sick and for convalescence (including rehabilitation but not preconvalescence):-

Type of Hospital	Type Number	Definition
Acute	1	Hospitals with not more than 15 per cent. of their beds allocated to the "excluded departments."
Mainly Acute	2	Hospitals with more than 15 per cent. and up to 40 per cent. of their beds allocated to the "excluded departments."
Partly Acute	3	Hospitals with more than 40 per cent. and up to 60 per cent. of their beds allocated to the "excluded departments."
Mainly Long-stay	4	Hospitals with more than 60 per cent. and up to 85 per cent. of their beds allocated to the "excluded departments."
Long-stay	5	Hospitals with more than 85 per cent. of their beds allocated to the "excluded departments."
Chronic	6	Hospitals with 90 per cent. or more of their beds allocated to the chronic sick.
Preconvalescent	7	Hospitals with 90 per cent or more of their beds allocated to patients who have already received elsewhere the most intensive part of their treatment but who still require active nursing care and medical oversight.
Convalescent	8	Hospitals with 90 per cent. or more of their beds allocated to patients recovering from a disability who no longer require active medical supervision or nursing care in bed though they may need such simple nursing procedures as renewal of dressings or the administration of medicines.
Rehabilitation	9	Hospitals with 90 per cent or more of their beds allocated to patients who no longer require nursing care in bed and who, with or without the aid of appliances, can get about and attend to their own needs with occasional assistance but who require remedial and re-educative treatment with a view to their attaining the maximum degree of recovery of use of functions.
Isolation	10	Hospitals with 90 per cent or more of their beds allocated to infectious diseases.
Maternity	11	Hospitals (including General Practice Maternity Hospitals) with 90 per cent. or more of their beds allocated to obstetrics.
Mental Illness	12	Hospitals with 90 per cent. or more of their beds allocated to Mental illness.
Mental Deficiency	13	Hospitals with 90 per cent. or more of their beds allocated to mental deficiency.
Orthopaedic	14	Hospitals with 90 per cent. or more of their beds allocated to traumatic and orthopaedic surgery, including bone and joint tuberculosis.
Tuberculosis and Chest	15	Hospitals with 90 per cent. or more of their beds allocated to tuberculosis (both respiratory and non-respiratory) or diseases of the chest (including thoracic surgery) or both.
Tuberculosis and Chest and Isolation.	16	Hospitals with 90 per cent or more of their beds allocated to tuberculosis (both respiratory and non-respiratory) or diseases of the chest (including thoracic surgery) or both, and infectious diseases.
Children's (Acute)	17	Hospitals with 90 per cent. or more of their beds allocated as in Type 1 but for children only.
Eye	18	Hospitals with 90 per cent. or more of their beds allocated to that one function.

Type of Hospital	Type Number	Definition
Other Hospitals	19	These include Dental, E.N.T. and Neurosis hospitals and also:– (i) All hospitals wilh 90 per cent or more of their beds allocated to a single department not specifically named above unless that department is "General Medicine", "General Surgery" or "General Practice (Medical)" in which event the hospital would be classified as "Acute" (Type 1). (ii) All hospitals otherwise classifiable to Types 1–3 with 50 per cent or more of their beds allocated to one department unless the department is "General Medicine", "General Surgery" or "General Practice (Medical)". (iii) All hospitals not clearly falling into any of the foregoing Types (1–19(ii)).

2. Notes on certain headings included in the summary:–

(i) Columns 2,3,4,5 & 6	The figures in these columns, as in the remaining columns, relate to the financial year and not to the calendar year.
(ii) Column 4	The figures in this column show, for hospitals of types 1,2,3,4,16 and 17, the percentage of total occupied beds occupied by patients of the "excluded departments" (see Note 1); they have been introduced to indicate the the proportion of relatively long-stay patients in these hospitals, a factor which might have a significant effect on their costs.
(iii) Column 5	Where a substantial proportion of patients are in continuous treatment throughout the year – i.e., in hospitals of types 4,5,6,10,12,13,14,15,16 and 19 – these figures would be misleading and are therefore not quoted.
(iv) Column 6	The number of out-patient attendances is the total of attendances at consultative clinics and casualty departments together with the number of attendances of day patients (counting for costing purposes as out-patients).
(v) Columns 14, 38–40	Where a hospital laundry performs work for other hospitals, the entry in Column 14 against the hospital running the laundry is the net amount after deduction of recoveries from other users in respect of the principal direct expenses; any recoveries in respect of overhead charges are included in Direct Credits (Column 24). The figures in columns 38–40 have been calculated from the total number of units for the laundry and the total of the principal direct expenses.
(vi) Column 22	"Other Expenses" include such items as rent and rates, transport and travelling expenses of patients, and deficiencies on trading services.
(vii) Column 24	"Direct Credits" include such items as recoveries from staff for rent, board, lodging, supplies and services, surpluses on trading services, etc.
(viii) Column 26	The figures in this column are determined by dividing in-patient expenditure by the total number of discharges and deaths. "Total net in-patient cost per case" is not quoted for hospitals of types 4,5,6,10,12,13,14,15,16 and 19.

(ix) Columns 27 to 48

Unit costs are calculated by reference to the principal direct expenses of the departments and services concerned as follows:–

Medical Service Departments:

Salaries and Wages
- Medical (including payments made by R.H.B's)
- Professional and Technical
- Nursing

Drugs and Dressings
Medical and Surgical Appliances and Equipment

Catering

Salaries and Wages
Provisions

Hospital Laundry

Salaries and Wages
Washing materials
Plant and Equipment
Boiler House (proportion of expenditure)

Laundry – outside contract or group service

Total expenditure

Boiler House (steam production)

Wages (boiler house)) Excluding proportion allocated
Boiler Fuel) to hospital laundry.

Power, Light, Heating and Water

Fuel (other than boiler house), power, light and water

Maintenance of Buildings and Plant

Salaries and Wages
Plant, equipment and materials
Outside contract or group service

(x) Column 49

The turnover of the hospital is represented by gross revenue expenditure plus direct credits plus income.

3. * Denotes a local authority owned institution in which accommodation is reserved to the hospital authority;

/ Denotes a former local authority institution in which accommodation is reserved to the local authority for the purpose of Part III of the National Assistance Act, 1948;

// Denotes hospitals which incorporate thoracic surgery units;

4. R.H.B. – Regional Hospital Board.

H.M.C. – Hospital Management Committee.

B. of G. – Board of Governors.

ø (b) Provinces	21	11	2	23	11	1	27	10	1	42	10	9	46	8	1	52	7	9

NOTE:

The hospitals covered in the 1958 averages include not only those for which details appear in this publication but also those included in Volume I and which operated the Main Scheme. Comparison with the costs for earlier years, which also cover all hospitals in each type, must however, be made with caution – see paragraph 12 of foreword – particularly in the case of hospital types marked ø which contain a considerable proportion of hospitals at which there are significant out-patient attendances.

CLASSIFICATION OF HOSPITAL	NET IN-PATIENT COST PER WEEK			AVERAGE COST PER CASE
